PROFILE SUMMARY

Backend Engineer with 3+ years of experience in banking and securities environments (BCA Digital & BNI Sekuritas). Specialized in backend development, large-scale data processing, nightly scheduler/reporting systems, multithreading, reactive systems (Vert.x), and enterprise databases (Oracle/MySQL/PostgreSQL). Experienced in handling complex business processes, audit trails, and enterprise-level access control.

WORK EXPERIENCE

Backend Engineer – BNI Sekuritas

Under : PT. Nextgen Indonesia

April 2025 – Desember 2025

A. Research Portal (Vert.x + MySQL)

- Added user-type-based download access control.
- Implemented period-based audit trail filtering.
- Developed Access Control & Account Manager modules.
- Fixed email subject formatting issues (HTML takeout).
- Integrated publication report + OCR.
- Improved large-file downloads using asynchronous processing.

B. Enterprise Modules (Spring Boot + Oracle)

- Repo Account Opening Module enhancements.
- Optimized PEP & Beneficial Owner monitoring for AML.
- Implemented eKTP validation with Excel export.
- Built SDI Generator with multithreaded processing.

C. Pasardana Logo Sync (Scheduler + ActiveMQ + Redis)

- Developed scheduler to fetch stock logos from external APIs.
- Integrated ActiveMQ for event-driven updates.
- Used Redis caching for real-time logo refresh.
- Added retry logic and robust error handling.

Software Developer – BCA Digital (Blu)

Under : PT. EnigmaCamp

April 2022 – November 2024

A. Daily Reporting System (00:00–06:00 Scheduler)

- Built & maintained dozens of internal banking reports.
- Automated nightly reporting jobs.
- Used Java Native + PostgreSQL for large-scale data handling.
- Implemented batching & streaming queries.

B. Large Data Volume

- Reports containing 1,000–20,000+ rows.
- Tables with 40+ complex columns.
- Query optimization using indexing & partition awareness.

C. Complex Business Logic

- Converted complex business rules into Java implementations.
- Ensured compliance and data accuracy.
- Handled edge-case errors (missing data, anomalies).

D. Reliability

- Maintained stable nightly scheduler for 2+ years.
- Implemented retry & timeout logic.

Core Skills: Java 8/11, PostgreSQL advanced query, JDBC, cron scheduler, CSV/Excel writer, batching, indexing.

Skills & Technologies

Backend Development, Java (Spring Boot, Vert.x, Native), REST API, Multithreading, Oracle/MySQL/PostgreSQL, ActiveMQ, Redis, Docker, Git, Maven.

Key Achievements

- Managed high-volume reporting systems with zero critical failures.
- Improved export & retrieval efficiency in Research Portal.
- Built first event-driven logo sync system using ActiveMQ + Redis.
- Enhanced AML reporting modules (PEP/BO).
- Optimized multithreaded data generation/export for BNI.

Education

Informatika S1 — Universitas Ciputra Online (2025–Present)

Languages

Indonesian — Native

English — Intermediate

Interests

System Design, Architecture, Psychology, Music, Anime Art, National Digital Transformation, AI & Robotics.
